

SMART DRAIN

Silicone drain

SINGLE EXTRUSION FLUTED PROFILE

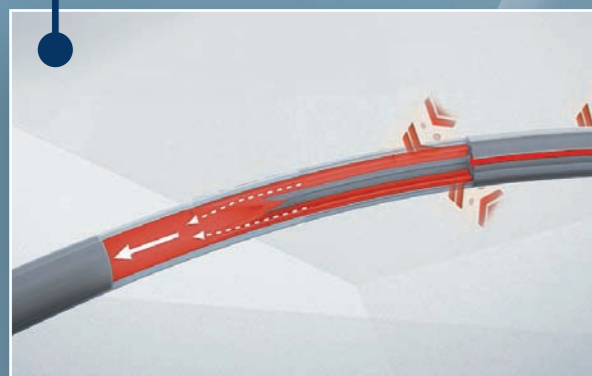

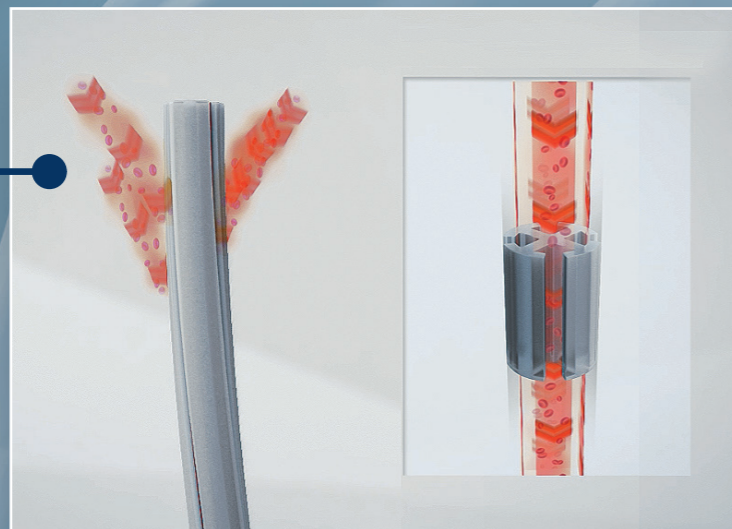

WHICH SURGERY

Innovative solution for many surgical procedures:

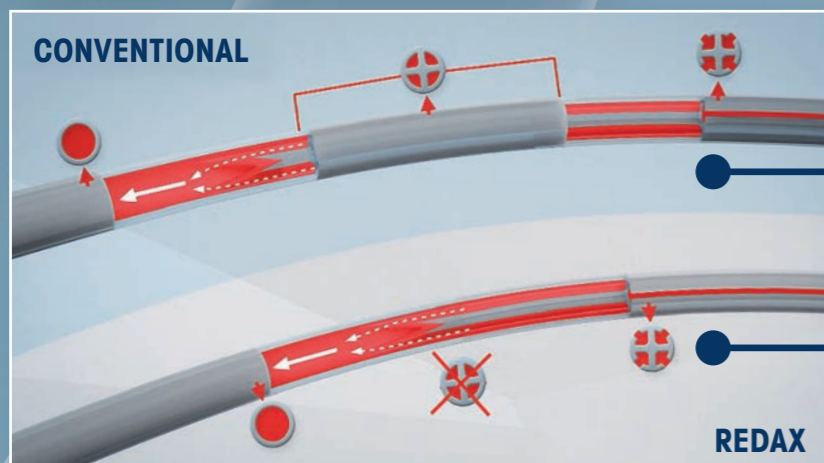

- Laparoscopic and minimal invasive surgery
- Plastic and reconstructive surgery
- Orthopaedics
- Neurosurgery

HOW

Single extrusion four fluted channel profile provides superior drainage compared to standard perforated drains.

Draining Surface			
Smart Drain		Standard Drain	
CH/Fr 10	720 mm ²	CH/Fr 10	62 mm ²
CH/Fr 15	1.092 mm ²	CH/Fr 15	99 mm ²
CH/Fr 24	1.560 mm ²	CH/Fr 24	184 mm ²

WHY IS BETTER

Using CONVENTIONAL hubless fluted drains, fluids transfer from fluted profile to round profile is not immediate, therefore the flow of fluids is reduced and risks of occlusion increased.

SMART DRAIN, thanks to Redax's extrusion technology, has a junctionless structure which allows direct transfer of fluids from fluted to round profile.

SMART DRAIN COAXIAL

All in one

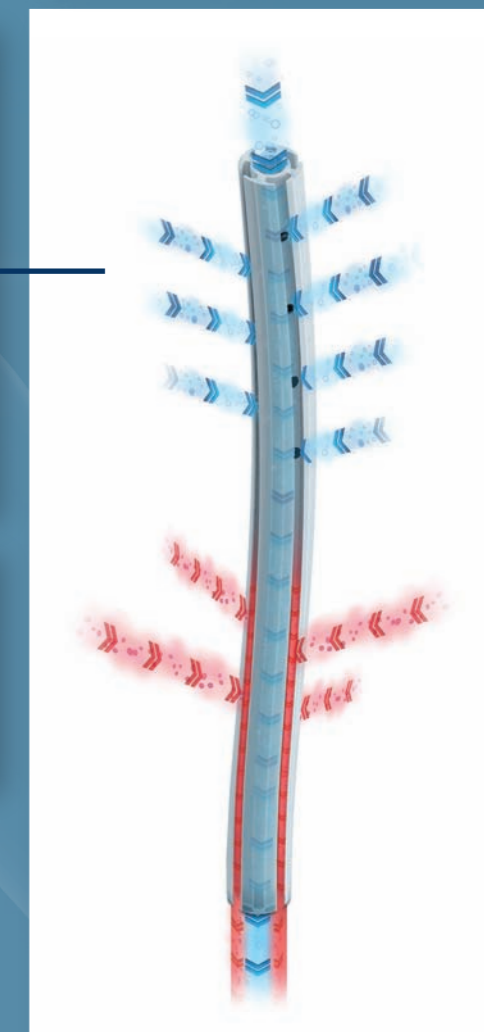

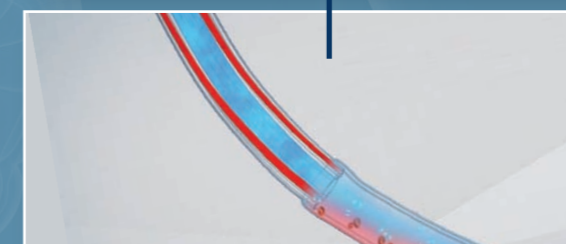

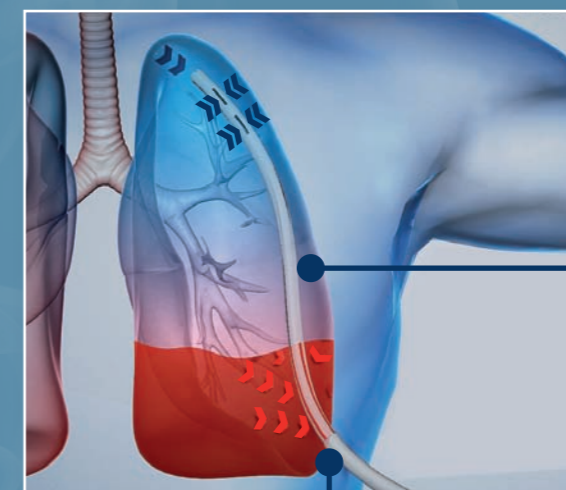

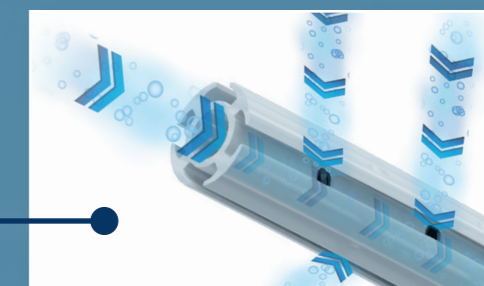

SYNTHESIS OF STANDARD BORE CATHETERS AND EFFICIENT FLUTED PROFILE

WHERE

New drainage solution for cardio-thoracic surgery

HOW

- Air evacuation from thoracic cavity through internal lumen and distal bores
- Liquids collection through four fluted channels

WHY IS BETTER

One drain a complete new series of advantages:

- Two chest tube no longer needed
- No risks of occlusion of thoracic catheter (i.e. drain blockage)
- Reduced patient's length of stay
- Suitable for all chest drainage
